G1 – Rx Only

Dose: Apply to the treatment area 1-3 times daily.

Quantity: 90gm

Days' Supply: 30-45

Delivery Vehicle: This is a topical cream that is formulated with an advanced transdermal pharmaceutical base that helps to promote tissue penetration of the active ingredients while minimizing systemic exposure.

Use: The ingredients contained in your custom prescription are commonly used for topical pain management of inflammation related to gout.

Do not use G1 topical cream if you are pregnant or plan on becoming pregnant during treatment. Avoid drug contact with eyes, mouth, or mucous membranes. Do not use this medicine if you have had an allergic reaction to one of its ingredients.

This personalized prescription is being formulated to the exact specification that your doctor has ordered.

How to Apply This Medicine

- Your doctor will tell you how often to use this medicine. **Do not apply more than instructed by your doctor.**
- Follow instructions on the label.
- Apply G1 cream to the affected area and rub in completely. Wash hands after use. Avoid contact with eyes and mouth.

Effectiveness

Treatment and progress vary from patient to patient. Independent data shows that signs of improvement may be evident within 2-4 weeks.

Call your doctor right away if you notice any of these side effects:

- **Allergic reaction:** Swelling in your face or hands, itching or hives, swelling or tingling in your mouth or throat, chest tightness, trouble breathing.
- Severe skin redness, skin peeling, or irritation.

G1 was specially formulated to meet your individual needs. **Questions:** Please call 636-614-3152 or email at support@ebmmedical.com. Thank you!
